

**Professional Summary:**

- **2 years** of Experience in Software Development using **Java** and other related technologies.
- Strong Knowledge in Software Development using **J2SE, J2EE and Java 8**.
- Having Strong knowledge on **OOP, Exception Handling, Multi-Threading and Concurrent Java API**.
- Having Strong knowledge on **Java Collections** and **Data Structure**.
- Experience in developing J2EE applications using **Core Java, Spring (Spring Boot, SpringCore, Spring MVC) and Hibernate with JPA**
- Having a good knowledge on **HTML5 and XML**.
- Good Knowledge on **JVM Architecture, Junit, Solid Design Principles, Maven, Git**.
- Worked on databases like **MYSQL**.

**Experience:**

1. Currently working as **Associate System Engineer** in **IBM India**, Bengaluru from Aug 2021 to till date.
2. Previously worked as **Associate software Engineer** in **Ameex Technologies, Chennai** from Sept 2019 to June 2021.

**Technical Skill:**

<b>Languages</b>	<b>C, C++, Java, SQL</b>
<b>Web Technologies</b>	<b>Servlet, JSP, HTML, XML</b>
<b>Framework</b>	<b>Hibernate, Spring Boot, Java Collections</b>
<b>IDE</b>	<b>Eclipse</b>
<b>Tool</b>	<b>Git</b>
<b>Server</b>	<b>Apache Tomcat</b>
<b>Database</b>	<b>MYSQL</b>

**Project Summary:****#Project 1**

<b>Title</b>	<b>Fitwise</b>
<b>Client</b>	<b>Confidential</b>
<b>Duration</b>	<b>Sept-2019 to June-2021</b>
<b>Technologies</b>	<b>Java, Spring Boot, Hibernate, MySQL, Spring Data Jpa</b>
<b>Server</b>	<b>Apache Tomcat</b>
<b>Team Size</b>	<b>8</b>

### **Project Description:**

- Fitwise project is an online platform where client subscribes to a fitness program published by the trainer.
- Fitness programs are classified based on type, expertise level, duration, and goals. Client can subscribe to the program according to his/her needs and goals.
- Features like trainer interaction, virtual session and many more.

### **Responsibilities:**

- Developed control layer and service layer of program module
- Design and development of Restful Webservice using **Spring MVC** and **Hibernate, Spring Data**
- Implemented **DAO, DTO** for required business logic
- Implementing the daily tasks, Involving in discussions and analysis of business logics
- Used Hibernate as **ORM** to map java classes to data base tables.
- Responsible for writing and performing unit testing with **Junit**
- Provided support for fixing bugs for UAT.

### **Project 2:**

<b>Title</b>	<b>Canara Bank</b>
<b>Client</b>	<b>Canara Bank</b>
<b>Duration</b>	<b>Aug 2021 to Present</b>
<b>Technologies</b>	<b>IBM App Connect, ESQL</b>
<b>Team Size</b>	<b>5</b>

### **Project Description:**

- Project involves developing middleware applications which provides integration service between different heterogenous applications that built on different technologies and having different domains of messaging.
- So, this middleware applications help different applications to communicate between them in easy manner

### **Responsibilities:**

- Involving in development of applications according to requirement using IBM App Connect, ESQL
- Developing message models and test parsing
- Participating in discussions and analysis of new requirements
- Involving in Production Support

### **Educational Qualification:**

- B. Tech, Computer Science and Engineering, Tezpur University (Assam) 2015-19.

### **Interests:**

- Software Development, Data Structures, Operating Systems, Computer Networking
